

Artem Achkasov

Middle Frontend Developer - React / Next.js / TypeScript

Khmelnitskyi, Ukraine • +380977782125 • officialachkasovjob@gmail.com • linkedin.com/in/eskalifer • github.com/Eskalifer1

SUMMARY

Frontend Developer, 3.5+ years turning business requirements into production React/Next.js/TypeScript apps - from scoping an MVP to shipping it in months. Architects shared component systems and configurable flows that cut duplicated work and let non-devs self-serve. Contributor Plus (C+) on Expensify's open-source app, reviewing and validating other developers' contributions across a large React Native codebase.

SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, SCSS

Frameworks: React, Next.js (App Router, SSR / SSG / ISR, Server Components), React Native

State & Data: TanStack Query, React Context API, MobX, Zustand, REST API, WebSocket

UI: Tailwind, Material UI, Ant Design, Shadcn, styled-components, Responsive Design

Forms & Validation: react-hook-form, Formik, Zod, yup

Tooling & Testing: Vite, Webpack, Jest, Git, ESLint, Prettier, i18n, Core Web Vitals, Jira, Claude Code

WORK EXPERIENCE

SaaS Platform (under NDA) - Middle Frontend Developer

Mar 2026 – Jul 2026 · Remote

- Built multiple 40+ step onboarding flows as configurable routes, reusing a shared component library to keep steps consistent without duplicating.
- Migrated the codebase from JavaScript to TypeScript and set up ESLint, Prettier and other tools, strengthening type safety across the team.

GlobalPartnerSoft - Frontend Developer (Junior → Middle)

Feb 2023 – Feb 2026 · Remote

Grew from Junior to Middle across several client and product projects within the company.

Wippli (via GlobalPartnerSoft) - Frontend Developer (Middle)

Feb 2025 – Feb 2026 · Remote

- Worked directly with the client to translate requirements into technical solutions for the core UI of a collaboration platform used by 20+ distributed teams.
- Implemented role-based access control across 4 user roles and user-facing feature flags for ~10 features, with permission-driven dynamic rendering enabling safe, gradual rollout.
- Created a dynamic form builder that lets admins assemble custom forms from typed fields, used in a separate marketplace flow - replacing dev work with business self-service.

Study UA (via GlobalPartnerSoft) - Middle Frontend Developer

Jun 2024 – Feb 2025 · Remote

- Built ~85% of the client side and contributed to the admin side in a shared codebase, scoping business requirements and shipping a production-ready MVP in 2 months.
- Designed a multi-theme system with 3 preset themes plus full user-level customization, using deep Material UI theming to stay consistent across every component.
- Integrated a custom chat library for real-time communication and created the email and certificate templating that delivers diplomas to 6,500+ students completing courses on the platform.

Wippli (via GlobalPartnerSoft) - Frontend Developer (Junior)

Sep 2023 – Jun 2024 · Remote

- Developed accessible, cross-browser features across client, marketplace and admin in React/TypeScript, splitting large components to reduce re-renders and improve performance by ~13%.
- Implemented live updates over WebSocket so task and project changes appeared instantly across all users.

PROBHUB - Estet (via GlobalPartnerSoft) - Junior Frontend Developer

Feb 2023 – Aug 2023 · Remote

- Delivered new features across 4 product sections of a live beauty-industry platform, extending existing functionality while keeping the codebase consistent as the product grew.
- Optimized site via SSG, ISR, on-demand ISR, and other performance work alongside SEO-focused AMP pages, cutting average page load time by ~24%(Google PageSpeed) and lifting SEO ranking.
- Refactored duplicated code across 4 sections into a shared module, eliminating cross-section inconsistency bugs and cutting feature time by ~20%.

OPEN SOURCE

Expensify - Contributor Plus (C+) · (part-time)

Jun 2025 – Present

- Promoted to Contributor Plus (C+): review external contributions and mentor contributors, maintaining code quality across the community.
- Contributed 100+ merged PRs, fixing bugs across a large React Native codebase and navigating complex, unfamiliar code.
- Developed strong code-review and architectural-analysis skills - identifying regressions, weighing solution trade-offs, and giving actionable feedback.

EDUCATION

Khmelnitskyi National University - Bachelor's in Computer Engineering - Sep 2023 - Jun 2026
